Discussion: Academia - Industry collaboration

December 17, 2007
Topics for further research collaboration

1. How to build a sustainable interface between Industry and Research.
2. How to go from training to learning and how technologies can facilitate it.
3. How to evaluate TEL effects - comprehensive tools measurements of effects, how to measure?
4. Segmentation between different generations of learners / types of learners. Flexible and adoptable standards - to be open - cultural and multidimensional
5. How to make the “assumptions” of learning explicit (change the assumptions – wrong or superficial or not explicit)
6. How elearning transforms the organisations
To improve the collaboration between TEL stakeholders:

1. Transparent terminology for TEL
2. Conceptual models of collaboration (benefits of both-sides of collaboration)
3. Entrepreneurship within educational system can lead to transfer of research outcomes into economic benefits
